Education/Work experience

Codespace Academy, Cape town — Full stack *Certificate*

January 2024 - June 2024

I studied at the academy. I honed many skills which are required for junior software developers. I learned essential tech skills as well as the ability to easily adapt in an everchanging tech landscape

Capaciti, Cape town/WLVsolutions, Stellenbosch — Full stack-*Certificate*

August 2024 - January 2026

I studied at Capaciti where I gained presentation skills as well as additional programming tech skills. I was placed in host placement through Capaciti at WLVsolutions, where I assist with building a website for a student accommodation building and many smaller projects as well, such as landing pages and ecommerce stores

Skills

HTML, CSS, javascript, react, [vue](#), tailwindcss, typescript, angular, git, python, java, wordpress, yoastSEO, [node](#), php, mysql, mongodb

Projects

Ecommerce hair product

During this project, I was helping a

Client with a custom website using

Tailwindcss, react, javascript, and

[Node](#). This was my first experience

Helping a client I got on my own, and also

Integrating whatsapp

Weather API

During this project, I was using Javascript,

Css, and html to pull data from an api to

Display weather forecasts and temperature.

This was done during a hackathon where I

Came 2nd place

Pacman clone

During this project, I was applying my skills in

Java and jframe to create a clone of the

The popular pacman game. This was a

Personal project
